

It's about that time of year again-- for the PHYSICS OLYMPICS! Mr. Richard's Physics Class students are gearing up to compete in the March 23, PHYSICS OLYMPICS which will be held this year at Coe College in Cedar Rapids. Pictured here are Ryan (left) & Edgar (right) with their invention which will compete in the CATAPULT CHALLENGE. They have been working on this for the last few months. The lessons learned here are: "It takes a lot of patience", "Don't get frustrated when things go wrong" and "When it works; don't mess with it"! Pictured on the second picture are Ryan & Edgar with a Stewart Elementary student Robbie (in the center). Robbie has cheered them on with all the after school practicing & work in perfecting their catapult!
