

The Washington Middle School (WMS) would like to give a very big THANK-YOU to Modine Manufacturing for donating a MIG welder to the Industrial Tech program. Mr. Lonnie Litchfield (with other Modine employees) got the welder ready to go and delivered it earlier this month. The welder will be used in the Intro to Industrial Tech program. This program introduces students to different areas of study they can pursue at the high school, such as drafting, CAD, Architectural drafting and Ag metals. Thank you again to Mr. Litchfield and the entire Modine team!
