

New Windows at Lincoln Elementary

Wednesday, October 02 2019 09:36 -

This year Lincoln Elementary started the school year with a new look, inside and out!! We received new windows in the original part of our building. Not only did putting the new windows in fix the problems we were having with water, but the aesthetics of our building from the outside is amazing! We gained such curb appeal adding windows that fill the designated space. On the inside, we have so much more natural light coming in and our hallways and classrooms are brighter! The shades we received allow for light to still enter, but it is muted some, so we are still able to see when we use our projectors. Thanks to the Washington County Riverboat Foundation for providing funds to help with this project! More pictures after the link!
