

In order to kick off the month of February and celebrate the character pillar of caring, Jodie Quick from the Leukemia and Lymphoma Society taught students and staff at Stewart Elementary about blood and blood cancer during an interactive assembly on January 26th. We then learned more about our upcoming change drive, Pennies for Patients, and how we can help children and families who have been affected by cancer by bringing in spare change from February 6th through the 24th. Students also sang a song and performed a dance to celebrate the wonderful kids of character they are. We are excited to show how caring we can be during the month of February!
